

1. What is LMS?

A **learning management system (LMS)** is a software application for the administration, documentation, tracking, reporting, and delivery of educational courses, training programs, or learning and development programs.^[1] The learning management system concept emerged directly from e-Learning. Although the first LMS appeared in the higher education sector, the majority of the LMSs today focus on the corporate market. Learning Management Systems make up the largest segment of the learning system market. The first introduction of the LMS was in the late 1990s.

2. Has any Learning management system been Deployed for FPNO?

Yes, **Moodle** has been deployed for the Purpose of or e-Learning/Virtual/Distance learning for staff and students of the Institution.

3. What is Moodle LMS?

Moodle is an acronym for "Modular Object-Oriented Dynamic Learning Environment." It is an online educational platform that provides custom learning environments for students. Educators can use **Moodle** to create lessons, manage courses, and interact with teachers and students. It is one of the world's most popular Learning Management System (LMS).

4. What is the Difference between Moodle LMS & Blackboard?

Moodle: **Moodle** is an open-source learning management platform designed to help schools educate their students. ... **Blackboard:** **Blackboard** Learn is a web-based LMS that's used in both academic and business environments to help students and employees improve their learning experience.

5. Which is better Moodle or Blackboard?

Moodle has a well-designed architecture, so it's faster as compared to **Blackboard**, where students have faced problems while loading pages. **Moodle** does not allow you as a student to work offline but **Blackboard** lets you complete your courses and activities offline.

8. What are the Activities a Lecturer can perform in FPNO LMS?

ACTIVITIES

- ☐ Assignment
- ☒ Chat
- ☐ Choice
- ☐ Database
- ☐ External tool
- ☐ Feedback
- ☐ Forum
- ☐ Glossary
- ☐ Lesson
- ☐ Quiz
- ☐ SCORM package
- ☐ Survey
- ☐ Wiki

The chat activity module enables participants to have text-based, real-time synchronous discussions.

The chat may be a one-time activity or it may be repeated at the same time each day or each week. Chat sessions are saved and can be made available for everyone to view or restricted to users with the capability to view chat session logs.

Chats are especially useful when the group chatting is not able to meet face-to-face, such as

- Regular meetings of students participating in online courses to enable them to share experiences with others in the same course but in a different location
- A student temporarily unable to attend in person chatting with their teacher to catch up with work
- Students out on work experience getting
